Move
heavy
loads
easily
and
safely

The CartMover™ SD is a battery-powered material handler - perfect for increased productivity.

The CartMover™ SD is a battery-powered material handler that is perfect for increasing productivity and ensuring worker safety whenever heavy loads on wheels need to be moved. It is as easy to use as a pallet jack – except far more powerful. It's portable and convenient, with no electric cords or pneumatic hoses to trip over. No more injuries from pushing heavy loads.

The CartMover™ SD Drives Productivity!

Where can it be used?

- Cell manufacturing facilities
- Vehicle repair or manufacturing
- Hospitals
- Aerospace manufacturing
- Commercial laundry
- Print and converting facilities
- Shipping and Receiving
- Anywhere you need to move loads on casters or wheels

Features

- 24V rechargeable battery
- Compact size and usability
- Variable speed throttle control
- 110a programmable speed controller
- Speeds from .1 to 4.5 mph
- Emergency reversing switch
- Rugged steel frame construction
- Superior OEM Support

CARTMOVER™

WE MOVE HEAVY

WE MOVE HEAVY!

We Engineered The CartMover™ SD to Keep Workers Safe

We believe people like to be productive on the job. That's why so many injuries occur every year as workers try to move heavy loads by themselves. They either thought the load would easily roll on its existing wheels or they simply were not patient enough to wait for a lift or tow motor. Now the CartMover™ SD can change all that. The CartMover™ SD is a heavy-duty tool, but light enough to be easily maneuvered by anyone. Our innovative battery-powered design provides the mobility needed to increase worker productivity while enhancing safe work practices.

Choose Your Hitch

The CartMover™ SD can be equipped with any variety of engineered or custom hitches to connect securely to various carts, bins, vehicles or other wheeled loads.

24v Batteries specially designed for high torque use

Battery Charger with LED display

No Down Time for Recharging

The CartMover™ SD features quick-charging battery packs and durable battery chargers with LED display. Rechargeable battery packs and charging units can be purchased separately. Also additional CartMover™ SD units can be purchased with or without batteries or charging units.

Risk-Free Demo of The CartMover™ SD

Contact us and we will ship a CartMover™ SD to your location. Use it for a limited time with no obligation to buy. See for yourself how its mobility, ease of use and overall design improves safety and productivity. Certain conditions apply.
